

Back to School

Be ready with Parry's Flexible Solutions

PARRY
Stainless Steel Products

Over 6000
units sold in the UK

Flexibility in catering operations and hygiene facilities are vital in successfully getting children back to school. Parry's range of catering and hygiene equipment provide adaptable and flexible solutions for the smallest to the largest of schools.

The Parry Back to School Range

Flexi-Serve

Is the latest modular servery from Parry and is designed specifically for the challenges of school catering. It's available in a range of sizes and configurations and with a range of accessories to suit your needs.

Mobile Serveries

Our range of mobile serveries are compact, ideal for small classrooms or moving hot food around your school and keeping them above 67°C.

Food Transfer Trolleys

Our trolleys allow you to move a large number of meals around your site and keeping them above 67°C.

Hygiene Solutions

Keep your pupils hands clean with our extensive range of mobile handwash basins and sanitiser stations. You can place them where you need them.

Why choose Parry;

- UK manufactured products, with nationwide availability and leasing options available
- Designed for Low Energy Usage - keeping your carbon footprint small
- Provides unrivalled flexibility and manoeuvrability - allowing you to adapt
- Capacities from 2 1/1GN to 5 1/1 GN - small enough for the classroom, large enough for the hall
- Colour coded steel or full printed wraps - ideal for identifying bubbles or showing your school logo

FLEXI+SERVE

The Flexible Servery

Flexi-Serve is the exciting new range of modular servery counters that can quickly and easily be used to create your ideal servery layout.

- Designed specifically for the challenges of school catering. Now available with a fully enclosed gantry for improved hygiene.
- Stainless Steel Coloured Options available that are ideal for colour coding - perfect for catering for schools in 'bubbles'.
- Available as heated, ambient or chilled modules and in sizes from 2 to 5 gastronorm pans.
- Flexi-Serve products have been designed to run on one 13amp plug where possible to minimise power consumption.
- Flexi-Serve can be used individually or suited together to form a fixed counter run.
- Available in 800mm or 900mm heights.

Key Benefits

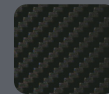

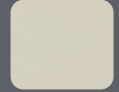

- Flexible** - Design the layout to suit your space, service needs, customer flow and capacity requirements
- Modular** - A variety of module types and sizes - heated, ambient, chilled & accompanying sections
- Adaptable** - Choose the modules which best suit your menu & operational needs
- Compatible** - Work with a range of gastronorm sizes
- Accessories** - Heated or illuminated gantries, tray slides, menu boards, interchangeable panels and more
- Versatile** - Use individually or suite multiple units to form a fixed counter
- Efficient** - Using the latest Induction and Hydrocarbon refrigeration technologies, most units run on a single 13amp plug for reduced power consumption and convenience
- Bespoke** - Range of finishes including steel, laminate or custom wrapped panels to suit your style and branding
